## What's New In Bitdefender Safebox?

Hacked? You're not alone. With more than 10 million people affected by online scams each year, cybercriminals are getting smarter. Hackers now take advantage of more sophisticated tactics, such as phishing, to steal your money, identity and sensitive information. Cybercriminals are increasingly targeting consumers using smartphones to steal their personal information or enable them to click on malicious links and open up a phishing or malware infection on their devices. Phishing attempts can lead to identity theft, and the malicious software could steal sensitive data, which could be used for identity theft or cyber-theft. If you are the victim of a cybercrime, it is important to understand that the cost to your reputation and your financial well-being can be devastating. According to the Federal Trade Commission, identity theft can cost victims more than \$50 billion annually. In addition, it is estimated that fraudulent activities, such as identity theft, can cost companies at least \$100 billion. Bitdefender, known for creating award-winning security solutions, provides unique, state-of-the-art protection and privacy solutions for consumers and businesses against online threats including malware, viruses, and spyware. Bitdefender is trusted by over 70 million users worldwide and has been the #1 cyber security company since 2011 according to PC Magazine.
