### What's New in the StarTrinity SIP Tester?

StarTrinity SIP Tester is a handy application for the users who need to test the performance of their SIP hardware or software. The application allows you to create a custom scripts for simulating incoming or outgoing calls. You can generate multiple calls at a specified time interval or send multiple DTMF (SIP INFO), REFER, RE-INVITE commands in order to test the hardware reliability. System Requirements: To use StarTrinity SIP Tester you need to have StarTrinity SIP phone or other SIP based soft phone. All calls are sent or received through the SIP Trunk that connects the phone to the SIP Server. StarTrinity SIP Tester is not compatible with 2 way phone, as it doesn't support physical calls. Usage: StarTrinity SIP Tester is very easy to use. First you need to choose the SIP Trunk to use. Enter the phone number that you want to make or receive calls from. You can choose to generate or receive multiple calls at a specified time interval. To generate calls enter the time interval. To receive calls enter the time interval. To generate multiple calls you need to enter the number of calls that you want to generate in the specified

time interval. Free Trunks: StarTrinity SIP Tester can use any StarTrinity SIP trunk to send or receive SIP calls. If the user want to use free trunks he need to add some code to the main.cf file. Send Calls: For sending calls, first you need to select the SIP Trunk, then the Source Address, Port Number and enter the phone number that you want to send. To add a custom SIP message you can use the following syntax: For example: call: s=212 dtmf: 1 1 What is new in this release: - Added Keyword Insertion capability, which allows you to add custom keyword on incoming calls. This feature is useful when you want to manage the incoming calls automatically. - You can send or receive calls by selecting a port. - You can generate a custom countdown timer on incoming calls. - You can now enter a custom message on SIP INFO command. Bug fixes: - Fixed the bug when the application is running on Windows 10. Changes: - Improved the code. - Added the SIP INFO command for custom messages. - Added the possibility to add a custom timer to the previous calls. - Added the possibility to clear the SIP INFO command. - Fixed the bug when the application is running on Windows 10. I'd like to thank You for choosing StarTrinity Softphones. StarTrinity SIP Tester

## System Requirements For StarTrinity SIP Tester:

OS: Windows 10 64-bit, Windows 7 64-bit, Windows 8.1 64-bit, Windows 8 64-bit, Windows 8.1 64-bit  
Processor: Intel® Core™ i3 CPU Memory: 4 GB RAM Graphics: Intel HD Graphics Network: Broadband Internet connection Storage: 4 GB available space Additional Notes: - Fov settings can be customized for the different menu settings. - A "Settings" tab allows for tweaking of the game, similar to XCOM: Enemy
