New features power a streamlined browser experience for editing, sharing, and collaboration. Share for Review (beta) enables users to share and manage projects online, and see exactly what changes each user has made. Since Share for Review is a web-based application, it doesn't require installing a new extension to your browser, and it works online for iOS, Android, and desktop, both Mac and Windows users. Adobe is widely recognized as a leader in creating zero-install technology, and Share for Review uses the same framework as the Photoshop web apps (PS Web Design Edition, PS Web Design, and Photoshop Files), so you won't need to download any additional applications or plugins. Share for Review (beta) is available now in the Photoshop Creative Cloud App Launcher. Edit a person's gaze, expression, and emotions in Photoshop with one click, and all changes will be reflected when you open the image again. The updated one-click Delete tool allows you to move and resize a person's eyes within a photo in just a couple of clicks, as well as move or resize surrounding objects, leaving the person's eyes and face in place. Using Select > Modify > Expand allows you to select a person's face (and leave the rest of the photo) to fill it with a beveled selection, and then edit the person's face separately using beveled selections. Adobe has also added new granular control for Depth Tools > Bevel & Emboss and Effects > Vignette & Distortion. In one action, you can add a bevel and emboss, control curve settings, blemish removal controls, and vignette and warp (distortion) effects.
